DATE

PUBLIC CLOUD

CREATING AN INSTANCE IN IBM CLOUD

AIM:

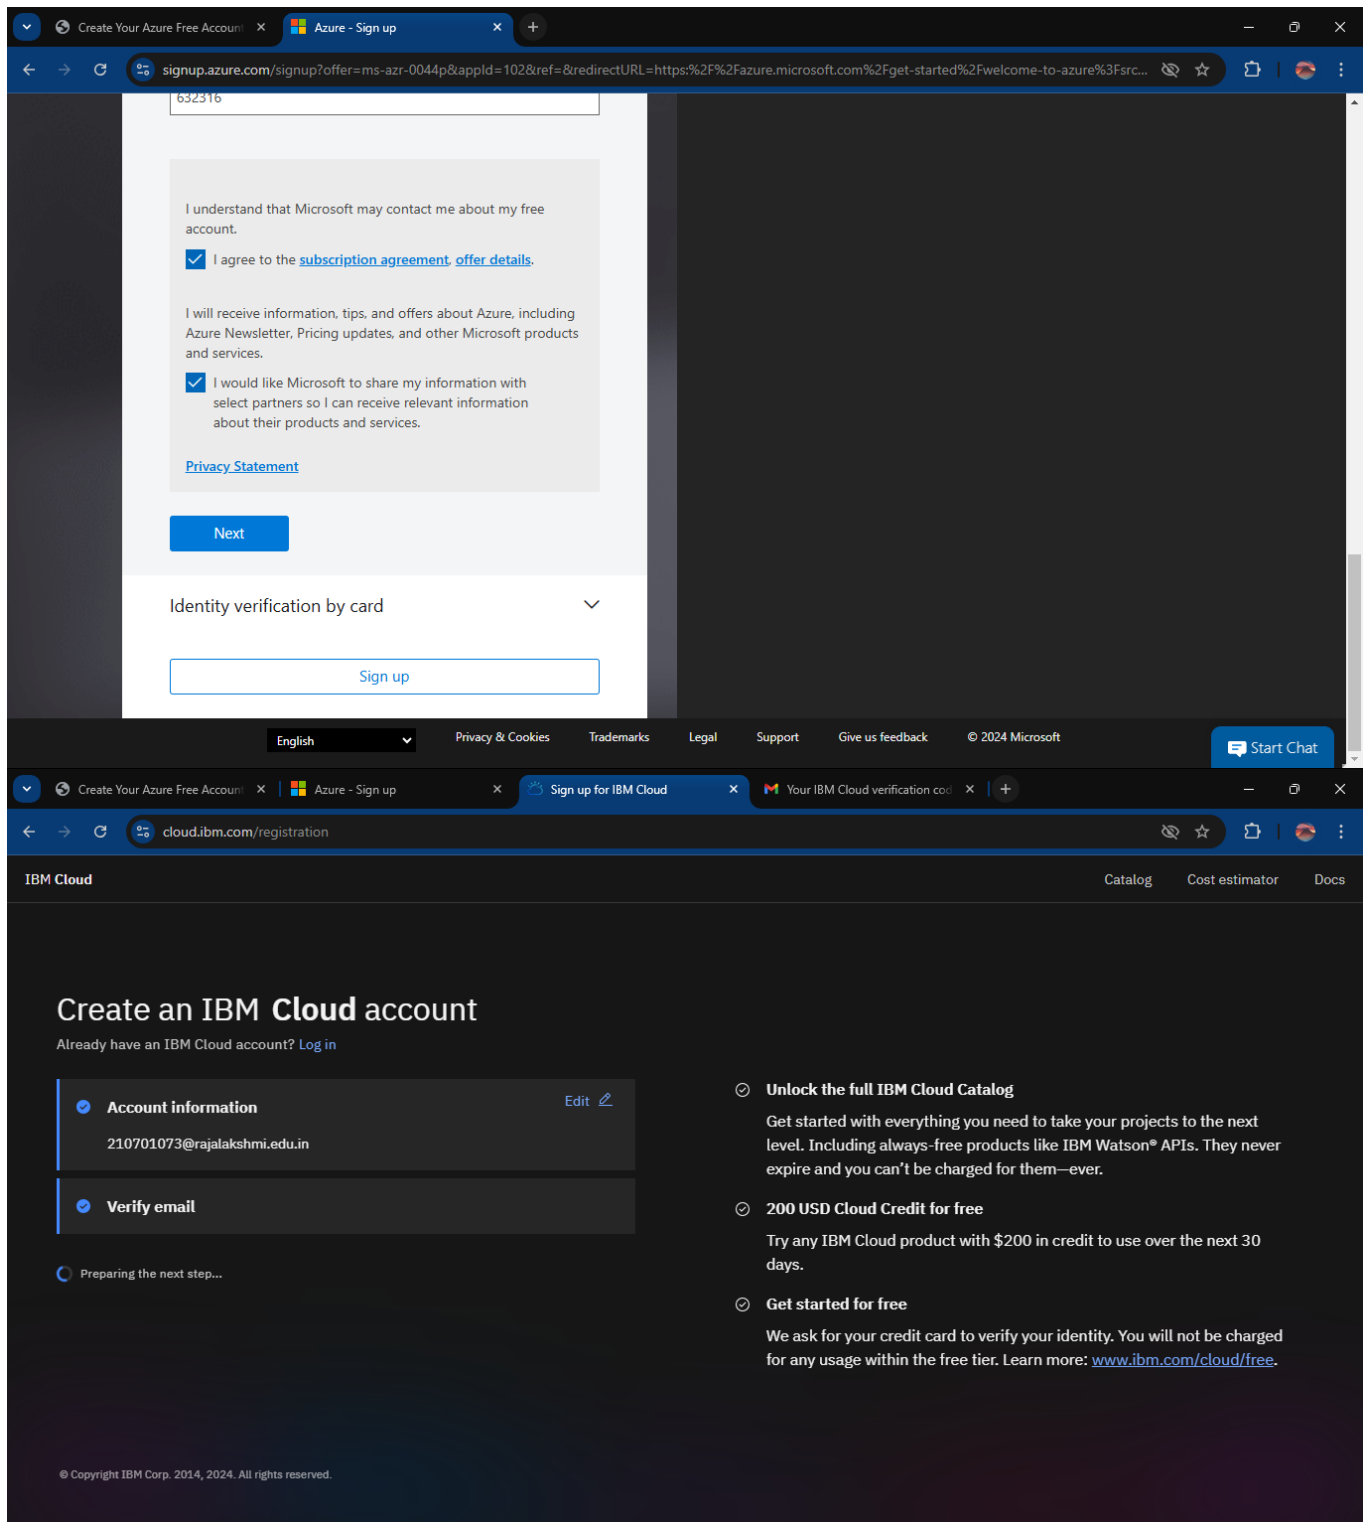

Develop a simple application to understand the concept of PAAS using IBM CLOUD

PROCEDURE:

1. In the IBM Cloud console, go to Menu icon Menu icon > VPC Infrastructure > Compute > Virtual server instances.
2. Click Create and enter the information required.
3. Click Create virtual server instance when you are ready to provision

OUTPUT:

The screenshot displays the Microsoft Azure sign-up interface. On the left, the 'Your profile' section contains a form with the following fields: 'Country/Region' (set to India), 'First name' (HARISH), 'Middle name (Optional)', 'Last name' (D), and 'Email address'. A note states: 'Choose the location that matches your billing address. You cannot change this selection later. If your country is not listed, the offer is not available in your region. Learn More'. On the right, the 'Create your Azure free account' section highlights three benefits: 'Popular services free for 12 months', '55+ services always free', and '₹13,300 credit to use in your first 30 days'. A 'No automatic charges' section explains that after the credit is over, users will be asked if they want to continue with pay-as-you-go. A 'Start Chat' button is located at the bottom right.
